

**Escort 9500ci cluster interface for 2008-13 C,  
2010-2013 E Class, 2012-2013 CLS, 2012-2013 ML, 2013 GL, 2013 G,  
2010-2013 GLK, 2011-2013 SLS, 2013 SL, 2007-2013 S, 2007-2013 CL  
with or without Distronic Plus**

(this manual assumes 9500ci is installed and functioning properly)

This interface will supply basic control of the 9500ci from the steering wheel buttons as well as an integrated display in the instrument cluster for the 9500ci display information **(The gauge cluster must be set to the “Audio” setting in order for 9500ci information to be displayed. The 9500ci brightness must be on any setting EXCEPT for “full dark”. The “full dark” setting will cause there to be no display output.)**

#### **Installation Instructions**

1. Two connections will need to be made between the 9500HS125 module and the Escort 9500ci module as outlined in the diagram below. One is for the display and the other is for the controller. Please use the provided cables.
2. The Escort controller will plug directly into the 9500HS125.
3. On vehicles equipped with Distronic plus, the Escort radar module will also be plugged into the 9500HS125 with an additional connection between the 9500HS125 and the Escort 9500ci module (as shown in blue in the diagram below).
4. Power input is switched and ground. This can be connected at the same place as the power for the 9500. An easy place to access this is at the cigarette lighter on the console.
5. The brown and brown/red twisted cable must be run to the CAN distribution block (see table for location). It can be plugged into any empty port. Make sure the correct CAN block is used. The colors should match the harness included with the module, Brown and Brown/Red.
6. There is an optional splitter included if the Escort display is desired in conjunction with the integrated cluster display. It should be plugged into the Escort 9500ci brain in order to add the additional display.

## CAN Locations

2008-2013 C	Passenger wire moulding below kick panel
2010-2013 GLK	Passenger wire moulding below kick panel
2010-2013 E	Passenger wire moulding below kick panel
2012-2013 CLS	Passenger wire moulding below kick panel
2012-2013 ML	Under glove compartment above black access panel
2013 GL	Under glove compartment above black access panel
2013 G	Passenger end of dash fuse panel (must swap CAN connector with extra provided connector in package)
2011-2013 SLS	Under driver's dash panel
2013 SL	Under driver's dash panel
2007-2013 S	Under driver's dash panel
2007-2013 CL	Under driver's dash panel
